

Dear Parent,

On behalf of all of us here at Magnus Health, I want to extend a warm welcome to you and your family. Your school has partnered with us to provide a simple, safe, and secure way to collect and manage your child's health and medical information. In doing so, they've allowed you to join thousands of other parents of K-12 students that are already utilizing our software.

If you have used Magnus to enter information about your student before, this year should be very easy. If you are new to the process, we understand that while change is exciting, it also can be daunting. The good news is that once you complete your information in Magnus, you can always update it throughout the year, and easily communicate with school staff, making the next year so much easier!

Please visit [magnushealth.com/parents](https://magnushealth.com/parents) to learn about our document collection process and the different types of information that we gather. You'll also find links to our privacy and security policy, terms and conditions of use, and online support resources. Additionally, our Help Desk can be reached at (877) 461-6831. We are happy to answer any of your questions and look forward to working with you.

Best,

Brian Biddulph-Krentar  
*CEO, Magnus Health*

Magnus Health online software improves the collection, tracking, and managing of student health information.
